Electrical Designer

Senior Electrical Design Engineer specialising in systems design and technical documentation. Proven track record delivering complex electrical solutions across the nuclear (fusion, remote handling), automotive, and manufacturing industries.

WORK EXPERIENCE

UK Atomic Energy Authority • Abingdon, England, United Kingdom • 09/2023 – Present **Senior Electrical Systems Engineer**

- Working on Electrical systems at RACE
- Designed and documented electrical systems to support ITER's remote handling robotics systems – remote work
- Developed radiation-hardened electrical architectures for remote inspection systems, ensuring EN and nuclear safety compliance
- Provided guidance on how to design radiation-hardened electrical and electronic systems
- Managed electrical isolations and pre-decommissioning planning documentation for JDR deplant operations
- Helped implement best practices in electrical design, ensuring compliance with regulatory standards and timely delivery

Fortress Technology Inc. and Sparc Systems • Banbury, England, United Kingdom • 06/2021 – 08/2023 **Electrical Design Engineer**

- Standardised Electrical Engineering design processes across two sites, improving design quality and cross-functional collaboration
- Specified and validated safety-critical components for food-grade machinery to ISO, CE, UKCA, and IEC standards
- Electrically led the development of low-voltage designs for machinery and provided technical support to manufacturing and sales to ensure alignment

Sorion Electronics • Birmingham, United Kingdom • 01/2019 – 05/2021 **Electrical Design Engineer**

- Delivered numerous automotive test rig designs from concept to production with a 100% on-time delivery rate
- Managed end-to-end electrical design, from CAD through handovers to manufacturing and factory commissioning
- Collaborated with mechanical engineers to identify and implement continuous improvement measures to improve the efficiency of meeting design deliverables

Jaguar Land Rover • United Kingdom • 10/2016 – 01/2019

Technical Analyst / Engineer

- Worked within the SVO electrical department and performing complex engineering tasks.
- Undertaking engineering from concept through to launch stages and supporting product lifecycles.
- Led planning and electrical integration for 2018 Discovery Commercial launch within the Special Vehicles Operations department in a project engineering capacity
- Managed WERS (Warranty Engineering Release System) electrical changes and AIM2 (Assembly Instruction Management) technical decks for production ramp
- Managing AIM2 decks and resolving engineering issues in a swift and timely manner.
- Raising parts orders for engineering builds at each stage of development.
- Providing expertise and support on behalf of SVO electrical and participating in meetings with senior management stakeholders with respect to various programmes.
- Resolved on-build electrical issues during vehicle production phases, maintaining production schedule and quality standards

EDUCATION

BEng (Hons.) Electrical and Electronic Engineering

University of Brighton • 09/2013 – 06/2016

BEng Energy Engineering

Penn State University • 08/2010 – 06/2013

High School

International High School (Shenzhen, China.) • 08/2006 – 06/2010

SKILLS

Cross-functional Coordination, Customer Service, DFM (Design for Manufacturability), DFMEA, Electric Systems Engineering, Multi-domain Engineering, NI Multisim, Power Systems, Rad-Hard System Design, Report Writing, Requirements Management, Research, Technical Documentation

General Software: MS Excel, MS Office, MS PowerPoint, MS Word, SAP, Various (quick learner)

CAD: AutoCAD, Basic Solidworks, Electrical CAD (Various), EPLAN

Domains & Standards: Automotive standards, BS EN 60204-1, CE/EMC compliance, EN 61508 / IEC 61508 (functional safety), Food industry Standards, Nuclear safety standards

Languages: English, Portuguese, Spanish
